

NOTE TO CLUBS REGARDING TEAM MANAGER ELECTRONIC ENTRIES

When setting up their database, clubs need to be aware of the correct way to do this. Some events, in particular All Junior, are sent on to the Swimming Victoria, and they have stated they will not accept entries if the details are not correct. In the same way, qualifying times may also not be accepted by the State bodies.

It is important firstly that clubs are set up with their correct abbreviation and name. These can be

found on the web sites of the State body concerned, and are listed below. Clubs also need to check that they do not have anything entered in the LSC section of the club setup.

This is not for Australia, and affects your club code; therefore SV and SNSW will not accept this.

When setting up your swimmers, make sure you only use the Australian ID. This should consist of the first three letters of the surname, the first two letters of the first name and the date of birth. Even though NSW issues swimmers with a registration number, this should not be used.
